

Hydrogen Potential in Latin America

First in a series

Is there a regulatory framework for H2?

Is there a domestic market & demand for H2?

Are there large industrial hubs for H2 use?

Is there infrastructure to transport H2?

Is there excess green power to use for H2 electrolysis?

Is there a large oil & gas industry to support blue H2?

Are there existing workforce skills to develop H2?

Is there blue or gray H2 in production?

Is there green H2 in production?

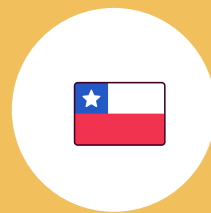

Is the government advocating development of H2?
